Abstract:

Brodifacoum (0.050 ppm) and bromadiolone (0.29 ppm) were detected in the liver sample of a red fox from Glenn County, CA. The liver sample was collected from the red fox as part of a long term genetics and population study. The cause of death for the red fox was not reported. (D1104583-01 S09-0809)

With the present submission it would be important to have postmortem evidence of a coagulopathy for a diagnosis of anticoagulant rodenticide intoxication. In the absence of a coagulopathy, the detected concentrations are consistent with exposure (not intoxication).

ELIS Incident Report

Part B: Pesticide Information

I024154-032

County: Glenn

State: CA

Date:

Pesticide: Brodifacoum (112701)

Type: R

Use Site:

Product: N/R

Appl. Method:

Appl. Rate:

Formulation: N/R

Air/Ground:

Legality: Undetermined

Certainty: Exposure Only

In the absence of a coagulopathy, the detected concentrations are consistent with exposure (not intoxication).

Pesticide: Bromadiolone (112001)

Type: R

Use Site:

Product: N/R

Appl. Method:

Appl. Rate:

Formulation: N/R

Air/Ground:

Legality: Undetermined

Certainty: Exposure Only

In the absence of a coagulopathy, the detected concentrations are consistent with exposure (not intoxication).
